

Quality Seed And Grain Equipment

Evolution Seed and Grain Cleaner

- The Q-SAGE, Inc. Evolution Seed and Grain Cleaner is a specialty Precision Air Screen Cleaner that employs modern upgrades to the traditional sweeping brush screen cleaning function inherent in “old school” cleaners
- Sweeping brush screen cleaning is preferred by the specialty seed industry that includes vegetable, wild flower, native grass and other sensitive seed species
- Upgraded brush cleaning mechanisms in this precision cleaner involve improved component strength, use of enhanced engineered materials and quality construction for gentle seed conditioning and long service life
- Features and benefits of the Q-SAGE, Inc. main line Air Screen Cleaner product line are incorporated into this specialty unit as well providing value and solid investment return
- Pre & Post Air System (2-Air) with “HIGH” Static Fans – Standard
- Independent Motors for the Fan, Eccentric & Feed-Roll
- Adjustable Screen Shake Speed by the use of a VFD on Eccentric Motor
- Direct Drive Feed-Roll to provide precision control of Feed by the use of a VFD
 - Also available optional vibratory feed
- Easy access to screens for clean-out and screen changes
